Low Risk investors want stability and to protect their current investments rather than increasing the real value of the investments

Low/Moderate investors want to protect their capital and achieve some real increase in the value of their investments

Moderate investors want reasonable but stable growth over the long term. They want less risk than a fully equity based investment.

Moderate/Aggressive investors want good real growth in their capital over the long term. A fair amount of risk is acceptable.

Aggressive investors want high capital growth over the long term. High risk is acceptable in exchange for high returns.
