Please note:

A linked annuity provides you with the flexibility (within the constraints imposed by the relevant authorities from time to time) to select your income to best suit your personal, financial and retirement needs. It therefore forms a key part of your own retirement income planning process and portfolio. Linked annuities should provide you with an income for life, and it is your responsibility to ensure that that the level of income that you have selected is at a level that would be sustainable for the rest of your life.

Please note that where the remaining capital is insufficient to provide and annuity for life, the Administrator may reduce the percentage selected.

The table below indicates indicative income levels for guaranteed life annuities with a 5% escalation rate for different ages. You should compare your current age to the table below. If your selected draw-down is above that reflected in the table you are at risk of not having enough capital to support such a level of income for life.

	Indicative linked annuity rates						
Age	55	60	65	70	75	80	85
Male	5.5%	6.2%	7.3%	8.7%	10.7%	13.5%	17.5%
Female	4.8%	5.4%	6.2%	7.3%	8.9%	11.2%	14.6%

It is important to note that the table is based on life annuity rates where the insurer carries the full investment and longevity risk, in contrast to a living annuity where you carry both of these risks in full.

If you survive for a longer period than the average life expectancy on which these rates are based, or your expense inflation is higher than those on which these rates are based, you could also run out of capital.

The income drawn from your linked annuity is not guaranteed and will be affected by the investment performance of the portfolios you have elected to invest in.

The Multilect Managed Annuity Fund is designed to receive (on a tax neutral basis) leaving-service benefits emerging from an employer's fund.

INVESTMENT OF THE BENEFIT

Multilect Managed Annuity Fund has no restrictions nor loyalties in terms of investment portfolio or asset manager choice.

The growth of your benefit will be based on how you elect to invest the benefit. Within the Multilect Managed Annuity Fund should you wish to change your investment decision at any time, generally this will be possible with one complete month's notice (some investment products impose longer notice periods).

Other than subject to any restrictions imposed by your investment managers you are able to direct the investment of your benefit to any investment product that complies with the prudent investment guidelines laid down by the Pension Funds Act. Most retirement fund investment managers' products for group funds comply automatically. Prudent Investment Guidelines means that no more than 75% of the portfolio may be invested in company shares, with the balance to be invested in more stable investments such as cash, property and government bonds. Most portfolios tend to invest only between 50% and 70% in company shares. Further, a portfolio is limited to investing a maximum of 5% in any one company, other than large capitalised value / blue chip companies, where a maximum of 15% is permitted.

Generally the best advice given to annuitants is to invest in a low risk portfolio. Where moderate risk portfolios are chosen, these portfolios have exposure to company shares but this exposure is generally focused on larger, more stable companies. Exposure to company shares means that the portfolio is subject to the volatility of the South African and international stock markets but with some cash, properties and bonds to balance the portfolio, this volatility is moderated to a degree. Short-term volatility is experienced under moderate risk portfolios.

Investment decisions should be taken after consultation with your Financial Adviser and in accordance with your risk profile in terms of age and other assets. It is generally recommended that as an investor age's portfolio selection should be weighed towards investment portfolio which offer low risk and/or capital protection.
