- **Proof of SARS registration number**
- **Proof of banking details**

MULTILECT PRESERVER PENSION FUND

The Multilect Preserver Pension Fund is designed to receive (on a tax neutral basis) leaving-service benefits emerging from an employer's fund. In terms of prevailing legislation, this preservation pension fund can only accept transfers from pension fund arrangements.

Please Note :

1. Members are able to access their benefits at any time provided there is no restriction imposed on this option by legislation, your employer or former Retirement Fund. In terms of current legislation, only one withdrawal, either partial or total is permitted prior to retirement.
2. If, on transferring your withdrawal benefit to a Multilect Preserver Pension Fund, you take part of your benefit as a cash sum, in terms of existing legislation, this will be treated as your partial withdrawal under the Multilect Preserver Pension Fund and you can only have access to your benefit at retirement.
3. The pensionable service period used to calculate the tax-free benefit at retirement will be transferred from your previous fund and preserved in the Multilect Preserver Pension Fund.
4. The status of any tax-free portion, which is transferred to the Multilect Preserver Pension Fund, is preserved.

INVESTMENT OF THE BENEFIT

Multilect Preserver Pension Fund has **neither restrictions nor loyalties** in terms of investment portfolio or asset manager choice.

The growth of your benefit will be based on how you elect to invest the benefit. Within the Multilect Preserver Pension Fund should you wish to change your investment decision at any time, generally this will be possible with one complete month's notice (some investment products impose longer notice periods).

Other than subject to any restrictions imposed by your investment managers you are able to direct the investment of your benefit to any investment product that complies with the prudent investment guidelines laid down by the Pension Funds Act. Most retirement fund investment managers' products for group funds comply automatically. Prudent Investment Guidelines means that no more than 75% of the portfolio may be invested in company shares, with the balance to be invested in more stable investments such as cash, property and Government bonds. Most portfolios tend to invest only between 50% and 70% in company shares. Further, a portfolio is limited to investing a maximum of 5% in any one company, other than large capitalised value / blue chip companies, where a maximum of 15% is permitted.

Generally the best advice given to long-term investors is to invest in a moderate risk portfolio. These portfolios do have exposure to company shares but this exposure is generally focused on larger, more stable companies. Exposure to company shares means that the portfolio is subject to the volatility of the South African and international stock markets but with some cash, properties and bonds to balance the portfolio, this volatility is moderated to a degree. Being long-term investments, short-term volatility is normally acceptable for the sake of long-term performance.

Investment decisions should be taken after consultation with your Financial Adviser and in accordance with your risk profile in terms of age and other assets. It is generally recommended that as an investor approaches retirement age portfolio selection should be weighed towards investment portfolio which offer low risk/capital protection.

I confirm that I have read the above and discussed my investment selection with my Financial Adviser.
